

QUANTUM PUZZLE MAZE

**A Strange New Maze of Numbers,
Logic, and Turns**

Find the secret path from A to B

Add the numbers. Follow the clues. Don't break the universe.

Welcome to the Quantum Puzzle Maze

In most mazes you wander until you get lucky.

In a **Quantum Puzzle Maze**, luck won't save you.

Each puzzle places you inside a tiny universe made of numbers. Your mission is to guide a path from **A to B**, but the path must obey the laws of this particular universe.

The route is built from **segments 3–6 cells** long, and every segment must match a **unique clue sum**.

Clues are sorted by value — not by path.

Because the multiverse enjoys chaos.

In harder puzzles segment length maybe missing.

And beware: your path cannot cross itself... and **it cannot even touch itself at the corners**.

Break the rules and you don't just hit a dead end — you collapse into a timeline where the puzzle no longer works.

A Note From the Multiverse

The puzzles and solutions in this book apply to Universe #042.

In other universes the grids, clues, and solutions may differ.

But in this universe...

There is exactly one path that works.

Your job is to find it.

QUICK START

How to solve.

Start at A and reach B with one continuous path.

Use the clue numbers to guide you:

- ❑ each clue matches one straight segment
- ❑ the numbers on that segment must add up to the clue
- ❑ after each segment, the path must turn
- ❑ cannot cross, overlap, or even touch (including corners)
- ❑ no diagonal segments

Find the only path that makes **ALL** the clues work.

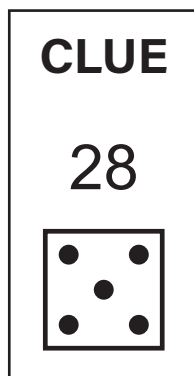

Note: Expect many dead ends. That's the point.

Tip: Start with clues that can only fit in one place.

A → **B** clues in order:

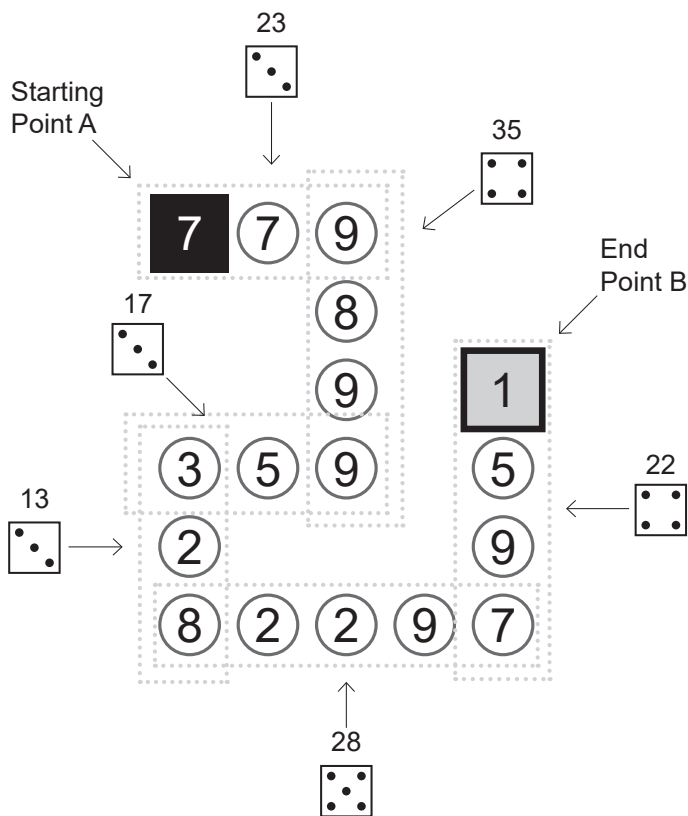

23 35 17 13 28 22

Clues are not in solution order.
Each clue is unique. No repeats.

Segment Sum
The sum of all the numbers.

Segment Length
Can be 3 - 6 cells in length
Maybe missing in harder puzzles

Every segment must end with a turn. No exceptions.
